

PauseM[®] Experiment Log

Hello new PauseM[®] user,

We would like to congratulate you on your first trial. To keep track of your tryout and help us further promote your success, we would be happy if you could fill out this experiment log during your testing. This will assist both of us during the pilot summary and while drawing conclusions for further stages.

At the end of the experiment, please scan/photo this document and send it back to us at **support@freeze-em.com**. We would highly appreciate it if you had any photos to attach to your summary.

Thank you, and good luck! 🍀

The FreezeM support team

General information

Company Name _____
